Version 2019.Q: What will be the output of this formula? I
have read a text which says: "If x is any number $a \leq x \leq b$, then x is contained in the interval (a,b) ." The
author has taken the form x to be the interval (a,b) and
the statement $a \leq x \leq b$ to be its property. But, why
did he not say like: If x is an interval (a,b) , then x is
contained in (a,b) (which is also the same thing he has
written)? A: You could say "If x is an interval (a,b) , then
 x is contained in (a,b) ." That's true, but it doesn't help
you much because knowing x is an interval is already part
of the information you are asking about. If you could choose
 x from the interval (a,b) then there would be no reason
to write it down as x and then rewrite it as (a,b) as well.

1. Field of the Invention The present invention relates to an
image processing apparatus for receiving image data from an

external image processing apparatus such as a scanner, a facsimile machine, a printer or the like. 2. Description of the Related Art An image processing apparatus disclosed in, for example, Japanese Laid-Open Publication No. 63-27409(A) has been used for the purpose of obtaining image data

The value of that variable is initially created in the parent component. It's usage scope is the whole component. component export class ModalComponent { public header:{headerContent: any} constructor(private modalService: ModalService, @Inject(DOCUMENT) private document:any) { } openNewWin() { this.header.headerContent = "new header"; //this.header.headerContent is null when this.header is accessed from the child component this.modalService.openModal(); } } child component this.backendService.getValues().subscribe(res => { this.submitted = true; this.response = res; }); this.modalService.closeModal(); this.backendService.getValues().subscribe(res => { this.submitted = true; this.response = res; }); this.header.headerContent = this.response.Header; } modal export class ModalService { public openModal() { this.modal.create('Contact sheet', 'ModalBody', 'close').then f678ea9f9e
