Nov 02, 2017 This is a beta release of Ygopro with support for Master Rule 4 (aka New Master Rules).. Finally, Percy released YGOPro with new Master Rule, so we can play Link Monster in this version.. Personally, I prefer YGOPro Percy version than another Automatic Duel System (ADS).

3. [ygopro 1.034.0 percy links \(beta fix2\)](#)

Which means Link monsters are now finally available! Also, cards that were impossible to implement in the previous version like Performapal Odd-Eyes Synchron, Trickstar Lightstage and Transmission Gear have been added.. Because this ADS has server room, so you can join another player's room or create your own room to duel.
